Giga AoE Series

SATA | Giga LAN | RAID | USB | SMART
AoE | WINDOWS | VISTA | Linux

AoE enabler **AoE**

SATA RAID over Ethernet

AoE (ATA over Ethernet) is a protocol that allows people using a remote storage acting like a hard drive located inside a local PC or server.

Unlike NAS (Net Attached Storage), AoE is a true SAN (Storage Area Network) configuration that usually implementing in expensive and complex systems which require a more flexible and aggressive storage upgrade strategy.

RAID over Ethernet presents a new approach to implement your storage over high speed Giga network in home or office environments.
Compact Mainboard with GPIO

Interface:
GbE   x1
USB   x1
eSATA   x1

RAID over Ethernet supports configurations of RAID 0, 1, 10, 3, 5, Clone, Large and HDD hot spare to ensure the maximum protection of your valuable data and files in home or offices.

Outstanding Signal Quality

RAID Configuration over Ethernet
